

WHAT INDEPENDENT REVIEWS SAY

“Once you move beyond entry-level Linux qualifications, you find that no other skills certification carries the same cachet as does RHCE from Red Hat. For years, the RHCE (Red Hat Certified Engineer) acronym has parlayed respect and admiration onto the person placing it after their name. It has been a symbol of competence unparalleled in the Linux realm. Last year, Red Hat introduced a lower level cousin for RHCE and announced the formation of the RHCT (Red Hat Certified Technician) certification. While certainly a lesser certification than RHCE, it is viewed with similar respect as the original Red Hat certification and is sure to grow in popularity as more systems administrators become aware of it.”

GLOBAL LEARNING SERVICES

Setting the standard for Linux training

WHAT IS IT?

Global Learning Services designs and delivers Red Hat's award winning training courses and certification programs.

WHAT DOES IT DO?

Global Learning Services offers a rich array of hands-on courses worldwide to meet the diverse training needs of Red Hat's customers. Certifications include Red Hat Certified Engineer (RHCE) and Red Hat Certified Technician (RHCT). Courses span topics such as system administration, advanced enterprise deployment, development, and security.

WHY SHOULD I CARE?

Effective training is the key to being highly productive. No other vendor matches Red Hat's experience and expertise in delivering Linux training. Our course materials are always the most up to date and are created and delivered by the best instructors in the industry. Red Hat training will help your team acquire the skills and proven competencies needed to make your organization more successful.

TRAINING WITH RED HAT

Red Hat® Enterprise Linux® is by far the most widely deployed Linux solution today. As the Linux pioneer, Red Hat has a long-standing and unique track record in providing highly effective Linux training.

For more than five years, Red Hat has set the standard for Linux training and certification programs. Red Hat's programs have always been committed to hands-on skill development and performance based testing in a lab setting that simulates real-life.

CERTIFIED
ENGINEER

redhat
CERTIFIED
TECHNICIAN

RED HAT CERTIFIED ENGINEER

Red Hat Certified Engineer (RHCE) began in 1999 and has been earned by over 10,000 Linux experts. Independent surveys have ranked the RHCE program as #1 overall for all of IT.

RED HAT CERTIFIED TECHNICIAN

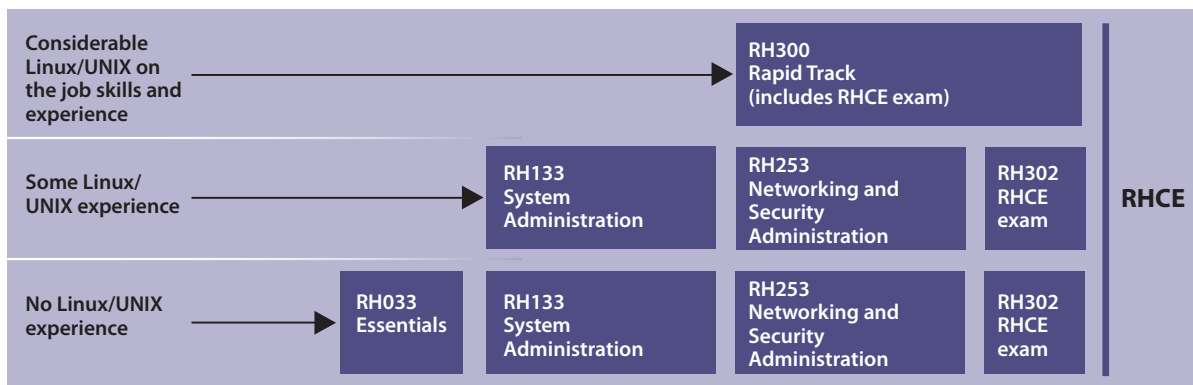

Red Hat Certified Technician (RHCT) began in January 2003 and has grown very quickly. RHCT is already regarded as the best first step in establishing Linux credentials and is an ideal initial certification for those transitioning from non-UNIX/Linux environments.

GLOBAL LEARNING SERVICES

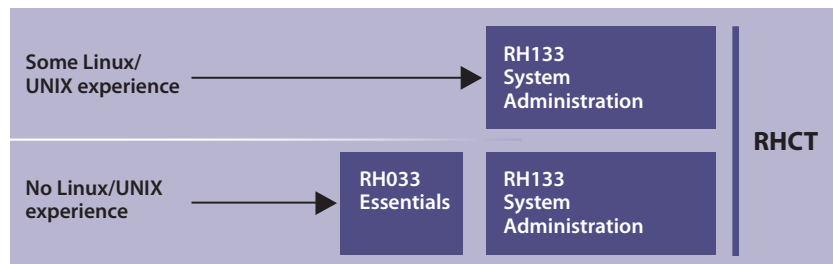

WHICH TRACK IS RIGHT FOR YOU AND YOUR TEAM?

Choosing the right Linux courses depends on your background and goals. Whether you have no experience with Linux or UNIX or whether you already have some skills, Red Hat Global Learning Services has a curriculum track that is right for you and your team. Below are the most common tracks for hands-on training whether your goal includes getting certified as an RHCT or RHCE.

Goal: RHCE

Goal: RHCT

Still not sure which track is right for you and your team? Take our free online training skills pre-assessment questionnaire: www.redhat.com/training/assess.

WHAT PEOPLE HAVE SAID AFTER RED HAT TRAINING

"Walks all over any other UNIX class I had"

"Proves what you can do, not how well you take multiple-choice tests"

"Red Hat is on par with Cisco"

"A true test of your skills as a Red Hat Linux engineer"

"Don't ever move away from performance-based testing"

"Red Hat certification helps tremendously in obtaining new Linux work. This certification shows potential clients that I have done more than just play around with Linux. When the very company that has the #1 Linux distribution certifies you, it erases many doubts for potential clients."

COURSES IN RHCT/RHCE TRACK

RH033

Essentials

Learn the basics of a Linux environment and prepare for a future role as a system administrator. This course focuses on the use of the command line interface and basic commands crucial for an administrator or system engineer. Prepares for RH133.

Duration: 4 days

RH133

System Administration – RHCT

Gain intensive hands-on systems administration training. Learn to install and configure a Linux system and attach it to an existing network. This course includes the RHCT certification exam on the last half-day.

Duration: 4.5 days

RH131 is the equivalent 4 day course without the RHCT exam.

RH202 is the RHCT exam only.

RH253

Networking and Security Administration

Learn how to configure network services and perform security administration. This course prepares someone for the RHCE course (RH300) or the RHCE exam (RH302) if they have significant on-the-job training.

Duration: 4 days

RH300

Rapid Track RHCE

Rapid hands-on intensive training for experienced Linux/Unix users. Prepares an administrator for the RHCE exam on the final day of the course. System administrators learn to manage Red Hat Enterprise Linux servers and configure network services and network security.

Duration: 5 days

RH301 is the equivalent 4 day course without the RHCE exam.

RH302 is the RHCE Exam only.

ADVANCED ENTERPRISE COMPUTING COURSES

RH401

Enterprise Deployment and Systems Management

RH423

Enterprise Directory Services and Authentication

RH436

Enterprise Storage Management

RH442

Enterprise Performance Tuning and Systems Monitoring

All 400-level courses require RHCE or equivalent experience.

SECURITY COURSES

RH320

Apache Secure Web Server Administration

RHS333

Red Hat Enterprise Security: Network Services

RHS342

Developing Red Hat Firewall Solutions

DEVELOPER COURSES

RHD 143

Programming Essentials

RHD 221

Red Hat Device Drivers

RHD 236

Red Hat Kernel Internals

RHD 248

Red Hat Embedded Systems

RHD 256

Red Hat Applications Development and Porting

THREE WAYS TO GET TRAINED

- **Open Enrollment**—Red Hat's courses are offered continually in 35 locations across North America and 85 locations worldwide. You can expect the same content and quality no matter where you are.
- **Onsite training**—Training for your team delivered by Red Hat at your facility (12-16 people per class). A great way to train a large group at once. Open enrollment can be leveraged later for incremental training.
- **E-Learning**—Learn the standard track skills for RHCT/RHCE at your own pace from a remote site on your timetable.
